

Task for Junior QA specialist

For the purpose of the homework, we will limit the tests to the settings section located at <https://dashboard-sandbox.coingate.com/account/dashboard>

You are expected to:

1. Write test cases for Sign-up form <https://sandbox.coingate.com/register>
2. Write test cases for “new payment button” form <https://dashboard-sandbox.coingate.com/account/buttons>

*In order to create new payment button you have to create business account first.

3. Write one bug report.

4. **Optional:** write a happy path automated test for Coingate invoice page.
An invoice page can be reached via payment button you have created while completing second task.

Please research and use good practices on organizing and designing automated test (e.g. PageObject model).

5. Document whole project with a readme file.

You are free to use any tools and methodologies you want.

Evaluation

We will evaluate the solution from different perspectives including:

- Systematic approach to the problem.
- Overall technical knowledge.

You have one week to complete your mission!

Questions

For additional information and questions feel free to write us back.
